

Kendama

Technical sheet

Outline:

- Fixed show of 35 to 40 minutes length
- Possible ambulatory on a flat and smooth floor (neither stairs nor "ship") during 5 to 15 minutes maximum.
- Audience capacity: approximately 1500 people
- Greatest time to start the performance: at nightfall

Acting space:

A square acting space of 20m x 20m with a flat, smooth and horizontal floor. In order to preserve the atmosphere of the show, it is desirable to perform in a quiet place. The audience states around this acting space.

Music box (electric vehicle of 1 500 kg) and skittles (16 skittles, battery lighting system) setting:

Near the dressing room, a light place like a shed or a covered playground (measuring at least 4m x 5m, with doors at least 1.80m large and 2.20m high) with the following equipment is needed:

- 3 electric plots of 16A each, in 220V
- helium: 3m³ standard helium are necessary for each performance
- 1 table and 2 chairs

NB: The place must be accessible for 1 van and 1 trailer (see the dimensions below)

Dressing room:

A clean, warm and light dressing room designed to receive 9 people (35 to 40m² x 3m high) is required. It must be located near the place of departure, and equipped with a watering place, toilets, mirrors,

- 5 steady tables (about 2m x 1m x 0.80m high) for costumes and stilts setting.
- 9 chairs
- 1 handle for the costumes
- 1 plot 220V to charge the batteries
- Food and drinks for 9 people in the dressing room

Car park:

A secure parking area is essential, with enough space to park:

- 1 van (dim. 5m long x 2.50m high)
- 1 minibus (dim. 5m long x 2.20 high)
- 1 trailer (dim. 5m long x 2.50 high)

NOTA: May we suggest you to send us a description sheet of the place or a map with the dimensions of the acting space.
